

Aesthetic Medicine

Tecartherapy - Diathermy

C 400

Manual or Automatic Tecartherapy

Electrical Transference of Capacitive and Resistive Energy (4 channels)

CE
0120

Therapeutic Possibilities

Capacitive - CAP
Isolated

Resistive - RES

Automatic - AUTO
Unattended

- **Frequency Selection:** Yes. In need of therapy: 0.8 MHz. 1 MHz. 1.2MHz.
- **Tuning Frequency in Different Therapeutic Areas from the same patient:** Yes. The operator can select the frequency of interest in each of the channels (1 MHz 0.8 MHz 1.2 MHz).
- **Number of Channels Available:** 4 (Equivalent to treat four areas of the patient's body simultaneously)
- **Intelligent Channel:** Yes. The same channel allows you to use the manual capacitive and resistive handprobe, and the capacitive automatic plate.
- **Multichannel Technology:** Sí.
 - Application of the capacitive electrode in the four channels: Yes.
 - Application of the resistive electrode in the four channels: Yes.
 - Application of the automatic plate in the four channels: Yes.
- **Automatic Technology:** Yes.
- **Option of Crossfires (manual CAP-RES combined application):** Yes.
- **Option of Combined Manual & Automatic Treatments:** Yes.
- **Option of Bilateral Lymphatic Drainage --unattended--:** Yes.
- **Temperature Monitoring by Sensor:** Yes. In automated plates only.
- **Suggestions of Treatment by Guided Program:** Yes. (Athermal. Thermal. Highly thermal).
- **Basic or Advanced Screen:** Yes.
- **Viewing Biofeedback Parameters (absorbed energy , qualitative indication of real-time power, coupling, temperature, etc.), to conduct clinical research:** Yes.
- **Safety Switch:** Yes.
- **Hygiene Systems for Accessories:** Yes. Protective membranes for manual capacitive handpieces, and pouches (with or without gel) for automatic capacitive accessories.

The most important electromedical innovation of the last decades

Second Generation Tecartherapy

C 400

Aesthetic Medicine Tecartherapy - Diathermy

Technical Features

- **Upgrade:** Yes. Upgrade to Uro-Gynecological Physiotherapy by MJS intracavitary device.
- **Power:** 310 W channel* x 4 (1240W)
- **Weight:** 22,5 Kg
- **Measurements:** 55,6 x 42 x 22 cm
- **Includes Footstand:** Yes.

Environmental conditions

- **Temperature:** 68°F - 77 °F
- **Relative Humidity:** <80%

* power established in laboratory on resistive load of 400 ohms.
